

Bunnyhopping and Scripting in LTK Servers *READ THIS*****

by ***L.T.K*tommytoad** on Thu Mar 20, 2008 10:23 pm

Attention all who play on LTK servers!!!! EFFECTIVE IMMEDIATELY SCRIPTING OF ANY TYPE WILL NOT BE PERMITTED ON LTK CLAN SERVERS

Newer players or even not so new players who don't know how to employ scripts are at a definite disadvantage when playing against players who extensively use scripts. Scripts include any alias which alters your basic keyboard/mouse commands by combining keystrokes into one. One of the more popular are "improved jump" where you combine the duck and jump key and "bunnyhopping" where you combine multiple jump,wait,duck, etc. keystrokes into one. Also fast attack/weapon switch scripts will not be allowed. These include the zoom/attack/unzoom crossbow script and the grenade/shotgun attack script.

Even though these have no use in sev's mod...we also will not permit recharging scripts on our servers. This is because the script spams team chat and hlsw chat windows and also because new players don't know the script and thus think the user is doing something illegal.

If you are caught or even suspected of using scripts you will be warned once, then if you repeat you will be kicked once then if you repeat you will be permanently banned from LTK servers.

We want LTK to be a fun place to play for newer players and not a hangout for 'leet' players who just want to come in and own a bunch of noobs. If competitive script filled play is what you are after you will not find that at LTK.

Thanks for your understanding and support!
