

Old Forum Hacked - Spam Generator Installed

<http://www.ltkforum.ltkclan.org/phpBB3> by tommytoad@LTKClan.org on Sat Jan 05, 2008 11:05 am

I and I has sent me an email advising that they are getting a large number of complaints about spam email from our website. After much looking I think I found the malicious code that was installed via a user thumb file some time ago. I deleted the file and asked tk to delete all the files in the old forum. We will also keep an eye on our mail logs now that we know to and where they are located.

We will also tighten up the security on this forum and not permit upload of any user files onto the forum. All avatars, user files, etc. will have to be linked to from an offsite webspace from now on.

If this causes any inconvenience I apologize. The actions of 1 ***** crook affects the lives of many good people.

If any of you received spam from my ltkclan.org email address, i'm sorry...it was not me who sent it. If you get any unsolicited email from my ltkclan.org account please let me know and I will investigate.

Thanks.

tt
